

What NextGen Will Do For You!

Every flight, whether it is VFR or IFR, actual or forecast, requires an accurate knowledge of available resources. Modern trends in technology have provided new tools such as the NextGen enabled weather, ADS-B, FIS and TIS, and Foreflight applications. This is an important seminar for pilots who want to add to their knowledge base and learn how to use these new NextGen tools, helping them make safer flight decisions. Click the link below and register TODAY.

Directions: Hangar 3 - the former Christman Air Service Hangar at Washington County Airport. (KAFJ)
